-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 6) ☐ Other: \_\_\_\_\_.

### DETAILED ACTION

Applicant's election of Group I, claims 1-5 in the reply filed on February 6, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim 3 is objected to because of typographical error such as "gain" in claim 3, line 3.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over TeGrotenhuis et al (6,666,909) with or without Eastman (4,196,504) or Thomas ((6,158,502) .

TeGrotenhuis discloses substantially the features of the apparatus as claimed. That is, TeGrotenhuis discloses, teaches or suggests the claimed “..thermal transport apparatus comprising: a substrate having a flow path of a liquid-phase working fluid and a path of a wick member disposed the substrate; a communicating hole provided in the substrate for communicating the flow path of the liquid-phase working fluid of the substrate with the wick member; and vapor-phase working fluid; on at least one main surface of grains filling in the communicating hole...” as broadly claimed in claim 1. See e.g. the claims at cols. 10 –16. Eastman or Thomas renders obvious the claimed “grains filling in the communicating hole” . See the abstract of Thomas, and at col. 4, lines 33-49 of Eastman. To combine the references would have been obvious to one of ordinary skill in the art in view of TeGrotenhuis’ suggestion at col. 2, lines 30-37.

Claims 2-4 each is deemed to be a matter of design choice and “selected” as claimed e.g., in claim 3.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a).Adkins et al discloses an apparatus providing transports of working fluids.

b). Purzycki, Nishino et al and Jacob all disclose an apparatus providing for a gas-liquid contact in communication with a wick.
